BAE 311 301

**2.2.5** page 32

BAE 311 301 9

The BAE 311 301 is a 3/2-way spool valve ported G1/8" that can either be used normally closed (pressure at port 1) or normally open (pressure at port 3).

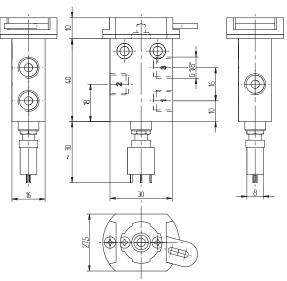

The valve includes an electric switch that is actuated at the same time.

The electrical switch can be used up to 6 A/125 VAC. Switch can be connected in two ways either normally open or normally closed.

The electrical switch can also be combined with BA 311 201, BA 511 201 and BA 511 301 on demand.

All the actuation-elements displayed on page 2.2.3 can be combined with the valve.

Please order including actuation element.
